Review of Activities

The strategy of Austral Gold Limited (the Company) is to maximize shareholder value through the development of mineral deposits in which the Company has an interest.

The Company continues to explore and invest in its Guanaco gold and silver mine (“Guanaco”) in northern Chile to expand its mineral resources, increase the mine’s annual production and mine life and improve its financial viability. This is our primary focus.

The Company is seeking to acquire further properties in Chile and has acquired properties in Argentina. The Company is also assessing a number of options to expand its existing asset base in Chile and Argentina.

Guanaco Gold and Silver Mine, Chile (100% interest)

Background

In January 2003 Austral Gold Limited obtained, through its subsidiary Golden Rose International Limited (GRIL), an option to acquire the Guanaco Project in Chile from from Compañía Minera Kinam Guanaco Limitada, a wholly-owned subsidiary of Kinross Gold Corporation.

At the General Meeting of the Company held on 14 March 2003, the Shareholders approved this acquisition and the Guanaco Project was acquired by Guanaco Compañía Minera Limitada - a company wholly owned by Guanaco Mining Company Limited (GMC) and incorporated in Chile.

Project and Mine Description

The Guanaco mine is the company’s primary asset located approximately 220km SE of Antofagasta in Northern Chile. It is at an elevation of some 2,700m and 45km from the Pan American Highway. Guanaco is located in the Palaeocene/Eocene belt, a structural trend which runs north/south down the centre of Chile, and hosts several large gold and copper mining operations including: Zaldivar, El Penon and Escondida.

The Guanaco operation includes the mining of ore from two open pits (Defensa and Perseverancia) at an average grade of 1.6 g/t gold. The majority of the ore processed came from the Cachinalito underground and nearby vein systems with 419,000oz in gold JORC Measured and Indicated resources averaging 3.2 g/t. Gold mineralisation at Guanaco is controlled by pervasively silicified, E/NE trending sub-vertical zones with related hydrothermal breccias. Silicification grades outward into advanced argillic alteration and further into zones with propylitic alteration. In the Cachinalito vein system most of the gold mineralisation is concentrated between the 75m and 200m levels and is contained in long shoots. High grade ore shoots (up to 180 g/t Au), 0.5 to 3.0m wide, have been mined out, but the lower grade halos, below 3 g/t, can reach up to 20m in width. The alteration pattern and the mineralogical makeup of the Guanaco ores have led to its classification as a high sulfidation epithermal deposit.

Guanaco recommenced production in August 2010 and poured its first doré bars in October 2010. In the 2012 calendar year, the company produced 30,403 gold equivalent ounces from this operation.

Production

Production from heap leach processes, using existing leach pads and new ore mined from two open pit mines, plus the underground operation generated 28,907oz of gold and 74,829oz of silver in 2012. The cash operating cost was approximately US\$ 859 /oz.

Production figures were behind budget due to labour supply issues experienced by the mining contractors; lower grade ore from the open pit; and ongoing cyanide supply issues across the mining sector in Chile.

Gold and Silver Production:

Production	2010 Cal Year	2011 Cal Year	2012 Cal Year	2013 Forecast

Old Heap Grade (Au g/t)	0.8
Weighted Average Recovery (%)	61.5
Gold Produced (oz)	28,907
Silver Produced (oz)	74,829
Cash operating cost (US\$/oz)	859

Safety

Nine lost time incidents (LTIs) were reported involving employees of the Company and its subsidiaries during the 2012 calendar year. These incidents have been thoroughly investigated and in all cases corrective actions have been identified and implemented to prevent recurrence. Safety is a core value of the Company and the implementation of strategies to identify and manage risks in our workplaces being our highest priority.

Exploration Program

Local and District Program

A total of 4,425m was drilled during 2012 which focused on exploring the new ore shoots hosted in the main known corridors - Cachinalito, Dumbo-Defensa and Perseverancia. The result of this program was not satisfactory and exploration of these areas using geophysics was abandoned.

A new high-grade gold vein was discovered in the underground development and has been named the Despreciada Vein. This vein shows a new and different strike opening providing encouraging potential to extend resources in the Guanaco Deposit.

Despreciada has a N30W strike and is sub vertical. It has been recognised for more than 70m in two levels, cutting the Cachinalito Vein with gold grades up to 50 g/t Au.

A comprehensive exploration plan, both at surface and underground, is being implemented to explore the potential of this new vein which strikes in the EW direction, this being the prevailing control for gold and silver mineralisation.

Porphyry Copper Exploration Program

Five holes totalling 4,873 metres, both RC and DDH, were drilled for this exploration program. The depth varies from 914 up to 1,000 meters. The Holes RC/DDH-999 and RC/DDH-1016 present characteristics of a Porphyry Copper environment. Both holes show a strong hydrothermal alteration, represented by Quartz and Sericite. This evidence is being used to define the location of the porphyry source and new holes have been programmed for 2013 to identify a Porphyry Copper structure beneath the Guanaco Deposit.

Notes to the Half-Year Financial Statements

1. CORPORATE INFORMATION

Austral Gold Limited is a company limited by shares incorporated and domiciled in Australia whose shares are publicly traded on the Australian Stock Exchange. Austral Gold Limited has prepared a consolidated half year financial report incorporating the entities that it controlled (the Group) during the period ended 31 December 2012.

The nature of the operations and principal activities of the Group are described in the Directors report.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(i) Basis of preparation of half-year financial report

The Half-year Financial Report does not include all notes of the type normally included within the annual financial report and therefore cannot be expected to provide as full an understanding of the financial performance, financial position and financing and investing activities of the consolidated entity as the full financial report.

The Half-year Financial Report should be read in conjunction with the Annual Financial Report of Austral Gold Limited as at 30 June 2012, which complies with International Financial Reporting Standards.

It is also recommended that the Half-year Financial Report be considered together with any public announcements made by Austral Gold Limited during the half-year ended 31 December 2012 in accordance with the continuous disclosure obligations arising under the Corporations Act 2001.

(ii) Basis of accounting

The half-year financial report is a general-purpose financial report, which has been prepared in accordance with the requirements of the Corporations Act 2001, AASB 134 "Interim Financial Reporting" and other mandatory professional reporting requirements.

The Half-year Financial Report has been prepared on a historical cost basis.

For the purpose of preparing the half-year financial report, the half-year has been treated as a discrete reporting period.

(iii) Basis of Consolidation

The consolidated financial statements comprise the financial statements of Austral Gold Limited and the entities it controlled during the period ended 31 December 2012 ('the Group').

The financial statements of controlled entities are prepared for the same reporting period as the parent company, using consistent accounting policies.

Adjustments (if any) are made to bring into line any dissimilar accounting policies that may exist.

All intercompany balances and transactions, including unrealised profits arising from inter-company transactions, have been eliminated in full.

Controlled entities are consolidated from the date on which control is transferred to the Group and will cease to be consolidated from the date on which control is transferred out of the Group.

Where there is loss of control of an entity in the Group, the consolidated financial statements will include the results for the part of the reporting period during which Austral Gold Limited had control.

(iv) Significant accounting policies

The Half-year Financial Report has been prepared using the same accounting policies as used in the annual financial report of Austral Gold Limited for the year ended 30 June 2012.

The Group has not elected to early adopt any other new standards or amendments that are issued but not yet effective.

INDEPENDENT AUDITOR'S REVIEW REPORT

To the members of Austral Gold Limited

Report on the Half-Year Financial Report

We have reviewed the accompanying half-year financial report of Austral Gold Limited, which comprises the statement of financial position as at 31 December 2012, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the half-year ended on that date, notes comprising a statement of significant accounting policies and other explanatory information, and the directors' declaration of the consolidated entity comprising the disclosing entity and the entities it controlled at the half-year's end or from time to time during the half-year.

Directors' Responsibility for the Half-Year Financial Report

The directors of the disclosing entity are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2012 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. As the auditor of Austral Gold Limited, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independence

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*. We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of Austral Gold Limited, would be in the same terms if given to the directors as at the time of this auditor's review report.

Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Austral Gold Limited is not in accordance with the *Corporations Act 2001* including:

- A. giving a true and fair view of the consolidated entity's financial position as at 31 December 2012 and of its performance for the half-year ended on that date; and
- B. complying with Accounting Standard AASB 134 *Interim Financial Reporting* and *Corporations Regulations 2001*.
